About PDW

Each year, DPI holds its annual Professional Development Week (PDW), a premier learning event for digital professionals. PDW is attended by 5800+ delegates ranging from technical analysts and policy makers to senior managers and Executives who all share a common goal: self-development.

In today's rapidly changing landscape, organizations must contend with constantly evolving technology that disrupts traditional ways of doing things. People and talent management are crucial factors in driving digital innovation and acceleration. PDW 2024 will explore how we harness talent to drive digital, including recruitment, retention and skill building, as well as fostering a culture of experimentation and risk taking in order to respond quickly to the changing landscape. Participants will gain valuable insights by learning and networking with thought leaders, experts, and practitioners to explore the latest trends and best practices in digital innovation and acceleration. Together we will think big, shift fast and accelerate digital.
