PROFESSIONAL DEVELOPMENT WEEK

MAY 11-13, 2022

LEARN & GROW

Increase your digital literacy! Learn from award winning keynotes, industry leaders and colleagues from across the Government of Canada on topics such as emerging technology, career development and mental health. Some key areas include DevOps Automation, Cloud, Accessibility and Digital Culture.

BUILD YOUR NETWORK

Visit the Networking Section to connect one-on-one, join a group chat or start one on your own. Meet colleagues from other organizations to share experiences and lessons learned. Or maybe even find yourself a mentor?

INTERACTIVE

Make sure to visit our Exhibitor booths to explore the latest in technology solutions, digital tools, access white papers, informative links, demos and collect spot codes to earn gamification points.

SOMETHING FOR EVERYONE

Content is geared to professionals at all levels from students to senior executives. All attendees will have access to the full program and features such as networking, gamification, and exhibit hall. Access to most sessions will be available on demand following the event so you won't miss a thing!

ACCESSIBILITY & SUSTAINABILITY

DPI's virtual platform is accessible and offers closed captioning in multiple languages. Delegates can join from anywhere and the schedule accomodates various time zones.

On-site we will be going paperless and offering water stations to reduce waste. Bring your own water bottle!
